

Programming the Zebra LS2208 Hand Held Scanner

The Zebra scanners are programmed in a similar fashion to the previously used SICK scanners using a series of barcodes. It is necessary to add prefix and suffix characters (! and #) to the codes. Before commencing this configuration, it is necessary to enable Code 93.

Cancel

If you make a mistake scan the Cancel.

Enable Code 93

Code 93 is now available.

To configure the scanner, scan each code in order with a slight pause between scans

The prefix and suffix programming begins here.

Scan Options

<PREFIX> <DATA> <SUFFIX>

Enter

Set Prefix (!)

Scan Prefix

1

0

3

3

Prefix is now set

Set Suffix (#)

Scan Suffix

0

3

5

Suffix is now set

Test Codes.

Code 128-A

Code 128-B

Code 39

Code 93

Open a text editor such as notepad and scan each test code.

In each case you should see the code with the prefix and suffix: **!KTBFF10123#**
